SUMMARY

Data Analytics and Business Intelligence professional with 15+ years of experience in insurance, banking, and healthcare. Expert in SAS, SQL, Python, and Power BI with a proven track record of building ETLs, dashboards, and advanced analytical reports. Deep insurance domain knowledge including loss triangles, reserving, pricing models, loss ratios, and regulatory filings. Skilled in big data platforms (Snowflake, Databricks, Hadoop/Dremio), predictive modeling (logistic regression, GLM), and translating complex data into actionable business insights. U.S. citizen, no sponsorship required.

CORE SKILLS

SAS (Base, Stat, Graph, Access, Connect, Enterprise Guide, Viya, Proc Report, Stored Processes, Macros) | SQL (Oracle, Teradata, SQL Server, DB2, Snowflake) | Python (pandas, openpyxl, PySpark ML, REST APIs, Flask) | Power BI | Big Data: Hadoop, Dremio, Hive, Databricks, PySpark | Cloud: AWS, Azure, GCP (working knowledge) | Excel / VBA | Git / GitHub | Jira | XML / JSON | RegEx | Unix / Windows scripting

EXPERIENCE

Senior Data Analyst (Contract, Remote/Hybrid) — Wells Fargo

10/2022 – 12/2025

Remote / Charlotte, NC

- Delivered business intelligence and data analytics for AML/Financial Crimes remediations (CIP, BO, CDD, KYC), building remediation populations and waterfall reporting for senior director review.
- Wrote complex, optimized SQL queries to extract and analyze data from Hadoop via Dremio/Hive and from Teradata, Oracle, SQL Server, and DB2; served as the go-to resource for challenging technical SQL questions.
- Built ad-hoc, time-sensitive SAS and SQL data extracts, reports, and dashboards for compliance teams under strict regulatory timelines.
- Developed and managed SAS ETL code for final remediation artifacts; drove enhancements including automated backup logic that improved analyst onboarding and reduced defect findings in peer reviews.
- Created population identification workbooks and visualization artifacts (waterfall charts) presented to senior leadership for approval.
- Authored code test scripts and collaborated with testers to validate data accuracy; recognized with a full-time offer upon project completion.

Data Analytics SQL/Python Consultant (Contract, Remote) — Truist

09/2021 – 03/2022

Charlotte, NC

- Ran SQL queries in Snowflake to extract and analyze data from the enterprise data lake/data warehouse for compliance analytics.
- Built a rules-based decision tool for compliance and data analysts using Python, enabling teams to select their optimal analytics application via a web form UI.
- Created and maintained user-access reports across proprietary applications and data repositories (AD, ACL) to support compliance monitoring.
- Ran reconciliation analysis between ServiceNow/RITM data and mainframe extracts to validate automated ticket creation; presented findings with PowerPoint to stakeholders.
- Produced reports and dashboards using the SAS grid and documented processes following internal governance templates.

SAS/Python Developer (Contract, Remote) — Florida Blue

04/2020 – 08/2021

Jacksonville, FL

- Developed ETL pipelines to extract, transform, and load data from Oracle and DB2 using SAS 9.4 on AIX/Unix and Enterprise Guide.
- Built agent fraud detection analytics for the SIU department, delivering multi-metric reports with automated Proc Report formatting via SAS macro.
- Created visualizations and operational reports using Power BI and Python to surface insights to business stakeholders.
- Automated and scheduled SAS ETL batch jobs in Unix and built a SAS stored process library for canned reporting, including a GUI-driven interface.
- Trained team members on SAS stored process design, covering GUI creation and dynamic variable handling.

Insurance Data Programmer / Data Manager — National General (Allstate)

04/2015 – 12/2019

New York, NY

- Reported to the holding company's Chief Actuary; served as the primary data and analytics resource for the actuarial and finance departments.
- Planned and built SAS datasets by extracting and integrating data from Oracle and SQL Server, producing loss triangles, LDF calculations, and ultimate claims estimates for reserving analyses.
- Reconciled actuarial data with the company's general ledger (Oracle) and created quarterly YTD Excel summary reports (with array formulas) supporting 10-K and 10-Q SEC filings.
- Independently created a logistic regression scoring model to assess auto policyholder risk; the model was deployed into production.
- Produced loss ratio reports, in-force policy reports, and ceded reinsurance calculations delivered to internal stakeholders, consultants, auditors, and regulators.
- Participated in the ATLAS project to capture claim and policy-level data into the GL Oracle database; created full documentation on legacy acquired-company data.

Data Scientist / SAS Programmer (Contract & FTE) — AIG

12/2011 – 12/2014

New York, NY

- Built ETLs to extract data from mainframe (VB/VSAM), DB2, SQL Server, and Oracle, creating enhanced datasets that became the data foundation for Global Actuarial Pricing.
- Developed SAS macro to produce a wide variety of loss triangles used to derive LDFs and estimate ultimate claims across multiple lines of business.
- Performed deep-dive profitability analyses on losses, premium, policy, and insured attributes to monitor segment performance; delivered reports and metrics to actuarial and underwriting leadership.
- Worked with Deloitte consultants on the Commercial Auto pricing tool and Specialty Workers' Comp predictive model, supplying loss triangles and validated SAS code and data deliverables.
- Created a smart policy-linking algorithm in SAS based on insured/policy characteristics, forming the foundation for the AQI (Account Quality Index) scoring model.
- Scheduled weekly jobs to extract underwriter submission data and refresh a QlikView dashboard for model performance monitoring.

Senior Data Analyst (Contract & FTE) — Aviva Canada

05/2008 – 12/2010

Toronto, ON

- Independently designed SAS stored processes with user-friendly GUIs to automate loss ratio reporting for commercial lines, reducing manual effort for the actuarial team.
- Extracted in-force policy data from the commercial book of business and provided clean, matched policy/claims datasets to EEA consultants for risk and pricing model development.
- Created facts and dimensions tables using SAS OLAP Cube Studio; produced documentation on all data and processes via HTML and VBA.
- Wrote and ran SAS reconciliation code for monthly actuarial data loads; investigated and resolved data quality issues reported by users.

EDUCATION

Master's in Statistics — University of São Paulo, Brazil

Bachelor's in Statistics — University of São Paulo, Brazil

Bachelor's in Mathematics — University of São Paulo, Brazil

MBA — EAESP-FGV, São Paulo, Brazil
