SUMMARY

Senior Data Engineer with 15+ years of experience architecting and operating large-scale data platforms across insurance and banking. Strong expertise in Python, SQL, cloud environments (AWS, Azure, GCP), Snowflake, Databricks, PySpark, and Big Data ecosystems. Experienced building ETL/ELT pipelines, data governance frameworks, and predictive/ML models. Familiar with LLM/AI workflows, RAG pipelines, vector databases, and Gen AI orchestration tools (n8n). Proven ability to bridge experimental prototypes and enterprise-grade production systems. U.S. citizen; no sponsorship required.

CORE SKILLS

Languages & Querying: Python, SQL, SAS (BASE/STAT/GRAPH/ACCESS/CONNECT/Macros), VBA, Unix/Windows scripting | Big Data & Cloud: Snowflake, Databricks, PySpark, Apache Spark, Hadoop, Dremio, Hive, AWS, Azure, GCP | Databases: Oracle, Teradata, SQL Server/SSMS, DB2, SQLite | Data Pipelines & Orchestration: ETL/ELT design, batch & real-time pipelines, SAS stored processes, GitHub Actions | AI/ML: Logistic Regression (SAS, PySpark ML), GLM, RAG concepts, vector databases, Gen AI (n8n workflows, LLM prompting) | DataOps/MLOps: Git/GitHub, VS Code, Jupyter Notebook, REST APIs, Airflow (familiar) | BI & Reporting: Power BI, SAS Enterprise Guide, Proc Report, Excel/VBA | Other: Data governance, PII handling, data quality, lineage, Jira, XML, JSON, RegEx

EXPERIENCE

Senior Data Analyst / Data Engineer (Contract, Remote/Hybrid) — Wells Fargo 10/2022 – 12/2025

Remote / Charlotte, NC

- Architected and maintained large-scale data pipelines and ETL frameworks used in AML/Financial Crimes remediations (CIP/BO/CDD/KYC) across multiple regulatory programs.
- Wrote complex, optimized SQL queries to extract and transform data from Hadoop (via Dremio/Hive), Teradata, Oracle, SQL Server, and DB2, serving as the go-to resource for challenging data engineering problems.
- Built remediation population identification workbooks and waterfall analysis reports; presented findings to senior directors for approval.
- Managed and enhanced SAS ETL code for final remediation artifacts; implemented automated backup logic to improve reliability and handoff between analysts.
- Created data extracts and ad-hoc reports under strict time constraints, following rigorous data governance and Confluence procedures.
- Developed and executed code test scripts in collaboration with QA testers to validate pipeline outputs and ensure data quality.
- Leveraged GitHub for version control and DMS as a secure artifact repository, enforcing access controls and data lineage practices.
- Recognized with a full-time offer upon project completion.

Data Analytics Engineer — SQL/Python (Contract, Remote) — Truist

09/2021 – 03/2022

Remote / Charlotte, NC

- Ran SQL queries in Snowflake to extract data from the enterprise data lake/data warehouse for compliance analytics.
- Built Python-based rules-driven decision tool (web form) to guide analysts in selecting optimal analytics applications.
- Performed reconciliation between ServiceNow/RITM ticketing system and mainframe data to validate automated processes; delivered findings via PowerPoint.
- Created and maintained compliance reports on user access across proprietary applications (AD, ACL) and produced documentation using internal templates.

SAS/Python Data Engineer (Contract, Remote) — Florida Blue

04/2020 – 08/2021

Remote / Jacksonville, FL

- Developed ETL pipelines to extract and transform data from Oracle and DB2 using SAS 9.4 on AIX (Unix) and Enterprise Guide, supporting multiple downstream analytics use cases.
- Built agent fraud detection analytics for the SIU department, creating automated multi-metric reporting with SAS macros (Proc Report).
- Automated and scheduled SAS ETL batch jobs in Unix; orchestrated secure file transfers between platforms using SFTP, WinScp, and VBScript.
- Designed and delivered SAS stored processes for canned report generation, with rich GUI for end-user parameter selection.
- Created visualizations and reports using Power BI and Python; trained team members on SAS stored process design and deployment.

Data Scientist / SAS Programmer (Contract & FTE) — AIG

12/2011 – 12/2014

New York, NY

- Designed and built ETL pipelines integrating data from IBM mainframe (VB/VSAM), DB2, SQL Server, and Oracle into SAS analytical tables that served as the data foundation for the Global Actuarial Pricing department.
- Developed SAS macros to produce loss triangles for LDF derivation and ultimate claims estimation across multiple lines of business.
- Engineered smart policy-linking algorithm in SAS, forming the data backbone of the AQI scoring model (Logistic Regression-based).
- Collaborated with Deloitte consultants on Commercial Auto pricing tools and Specialty Worker's Comp predictive models, ensuring data and code deliverables met requirements.
- Built and scheduled weekly automated jobs to extract underwriter submission data and update a Qlikview dashboard.

Insurance Data Programmer / Data Manager — National General (Allstate)

04/2015 – 12/2019

New York, NY

- Reported to the holding company's Chief Actuary; owned end-to-end data engineering for actuarial analytics across Oracle and SQL Server databases.
- Independently designed and deployed a logistic regression risk-scoring model for auto policyholders that was placed into production.
- Planned and created SAS datasets by combining data from multiple databases; produced actuarial loss triangles with SAS macros and reconciled results with the general ledger.
- Created quarterly YTD summary reports in Excel (with array formulas and GL data) to support SEC filings (10-K, 10-Q).
- Participated in ATLAS project to migrate claim and policy data into Oracle GL; provided data to external consultants, auditors, and regulators.

Senior Data Analyst (Contract & FTE) — Aviva Canada

05/2008 – 12/2010

Toronto, ON

- Independently designed SAS stored processes and ETL pipelines to automate loss ratio reporting with user-friendly GUIs.
- Provided clean, policy-claims matched datasets to EEA consultants for risk and pricing model development.
- Created OLAP fact and dimension tables with SAS OLAP Cube Studio; authored comprehensive data documentation in HTML and VBA.

EDUCATION

Master's in Statistics — University of São Paulo, Brazil

Bachelor's in Statistics — University of São Paulo, Brazil

Bachelor's in Mathematics — University of São Paulo, Brazil

MBA — EAESP-FGV, São Paulo, Brazil
