Centene

Re: Data Analyst III

I am writing to express my strong interest in the Data Analyst III position at Centene. With over 15 years of experience in data analytics, SQL, SAS, and Python—including direct experience in healthcare analytics at Florida Blue—I am confident that my background aligns closely with Centene's mission to deliver quality healthcare solutions to underserved populations.

Throughout my career I have built a track record of extracting meaningful insights from complex, large-scale datasets across healthcare, insurance, and banking. At Florida Blue, I developed ETL pipelines, fraud detection analytics, and automated reporting solutions for a major health plan. My expertise spans SQL across multiple database platforms (Oracle, Teradata, Snowflake, SQL Server), advanced SAS programming, Python data analysis, and Big Data tools including Hadoop, Dremio, and Databricks—skills I believe are directly applicable to the analytical challenges Centene faces.

I took a brief break from work for health reasons and am now fully ready and genuinely excited to return. I am energized to bring my skills to a purpose-driven organization like Centene, where data analysis directly supports better health outcomes for millions of members.

I would welcome the opportunity to discuss how my experience can contribute to Centene's data and analytics goals. Thank you for your consideration, and I look forward to speaking with you.

Sincerely,

José R. Sousa
