SUMMARY

Data Analyst with 15+ years of experience in insurance, healthcare, and banking industries. Expert in SQL, SAS, and Python for data extraction, ETL development, predictive modeling, and analytics reporting. Proven ability to work independently in remote environments, deliver actionable insights from complex datasets, and communicate findings to senior stakeholders. Strong background in healthcare analytics at Florida Blue, with hands-on experience in AML/compliance, loss analytics, and large-scale data remediation projects.

CORE SKILLS

SQL (Oracle, Teradata, SQL Server, DB2, Snowflake) | SAS (BASE, STAT, GRAPH, Enterprise Guide, Viya, Proc Report, Stored Processes, Macros) | Python (pandas, openpyxl, PySpark ML, REST APIs) | Big Data: Hadoop, Dremio, Hive, Databricks, PySpark | Power BI | Excel (VBA, advanced formulas) | Git | AWS / Azure / GCP (working knowledge) | Logistic Regression, Predictive Modeling, Machine Learning | ETL Development | Regulatory Reporting | XML, JSON, RegEx

EXPERIENCE

Senior Data Analyst (Contract, Remote/Hybrid) — Wells Fargo

10/2022 – 12/2025

Remote / Charlotte, NC

- Worked on AML/Financial Crimes remediations including CIP, Beneficial Ownership, CDD, and KYC compliance efforts.
- Built remediation populations (Trust, NRM4, and transportation assets) and created population identification workbooks and waterfall charts presented to senior directors for approval.
- Wrote complex, optimized SQL queries to extract data from Hadoop using Dremio and Hive, and from Teradata, Oracle, SQL Server, and DB2; served as go-to resource for challenging technical questions.
- Developed SAS and SQL code to produce ad-hoc, time-sensitive data extracts and reports following strict Confluence procedures.
- Managed SAS codebase for final remediation artifacts, adding enhancements and optimizations to reduce defects and findings in peer reviews.
- Created ETLs to map fields from execution data requirements (EDR) to data tables and contributed to artifact layout design.
- Used GitHub for code version control; utilized DMS as a secure repository for artifacts.
- Recognized with a full-time offer at project completion.

Data Analytics SQL/Python Developer (Contract, Remote) — Truist

09/2021 – 03/2022

Remote / Charlotte, NC

- Ran SQL queries in Snowflake to extract data from the enterprise data lake/data warehouse for compliance analytics.
- Created a rules-based decision tool for compliance and data analysts as an interactive web form built in Python.
- Maintained current reports on user accesses across proprietary applications and data repositories (AD, ACL) for compliance purposes.
- Ran reconciliation between ServiceNow/RITM and mainframe data to assess correctness of automated ticket creation processes; presented findings via PowerPoint.
- Produced SAS reports on the SAS grid and created thorough documentation following internal templates.

SAS/Python Developer (Contract, Remote) — Florida Blue

04/2020 – 08/2021

Remote / Jacksonville, FL

- Developed ETL code to extract data from Oracle and DB2 using SAS 9.4 on AIX (Unix) and Enterprise Guide for a major healthcare payer.
- Extracted data from multiple sources to build agent fraud detection analytics for the SIU department, creating various metrics and automating report formatting using Proc Report macros.
- Automated and scheduled SAS ETL jobs in Unix; composed HTML-formatted rich-text email alerts within SAS.
- Combined Windows batch scripts, WinSCP, and VBScript to automate file transfers and move data between platforms via SFTP.
- Created SAS stored processes for canned reporting; developed visualizations and reports using Power BI and Python.
- Trained team members on SAS stored process design, including GUI creation and handling dynamic user inputs.

Insurance Data Programmer / Data Manager — National General (Allstate)

04/2015 – 12/2019

New York, NY

- Reported to the holding company's Chief Actuary; mastered the company's claims data system (EPIC) and legacy Oracle/SQL Server databases.
- Planned and created SAS datasets by extracting and combining data from multiple databases to produce loss triangles and data analytics for actuarial reserving.
- Created quarterly company-wide YTD summary reports in Excel using Oracle GL data to support SEC filings (10-K, 10-Q) and annual report preparation.
- Independently developed a logistic regression scoring model for auto policyholder risk; model was deployed in production.
- Extracted data from SAS server to generate reports used internally and provided to consultants, auditors, and regulators.
- Ran statistical data analyses to track product performance; created complete documentation on legacy data from acquired companies.

Data Scientist / SAS Programmer (Contract & FTE) — AIG

12/2011 – 12/2014

New York, NY

- Extracted data from mainframe, DB2, SQL Server, and Oracle to build enhanced tables used across all reports, models, and processes using ETL and SAS/Access.
- Created ETLs to read VB/VSAM files on IBM mainframe and load them into SAS; these tables became the data foundation of the Global Actuarial Pricing department.
- Wrote SAS macros to generate a wide variety of loss triangles for LDF derivation and ultimate claims estimation.
- Developed smart policy-linking algorithm in SAS as the foundation for the AQI (Account Quality Index) scoring model.
- Collaborated with Deloitte consultants on the Commercial Auto pricing tool and Specialty Worker's Comp predictive model.
- Worked on deep-dive profitability analyses across lines of business by extracting data on losses, premiums, and policy attributes.

Data Analyst (Contractor) — Capital One

01/2011 – 11/2011

Toronto, ON

- Worked on AML efforts including KYC/CDD, using Excel/VBA and PowerPoint as primary reporting tools.
- Created an advanced SAS/Graph dashboard running weekly on Unix, distributed to a monitoring list to track web performance metrics.
- Built ETL jobs and scheduled them in Unix to load daily vendor files into SAS and Teradata.
- Automated customer bookings report with SAS Proc Report; created Excel/VBA workbook to retrieve Teradata data and auto-populate PowerPoint for AML monitoring.

EDUCATION

Master's in Statistics — University of São Paulo, Brazil

Bachelor's in Statistics — University of São Paulo, Brazil

Bachelor's in Mathematics — University of São Paulo, Brazil
