SUMMARY

Data Scientist and Analytics lead with 15+ years of experience in statistical modeling, predictive analytics, and data engineering across insurance, banking, and healthcare. Expert in SQL, Python, and SAS with hands-on experience in machine learning (logistic regression, PySpark ML), experimental design, segmentation, propensity scoring, and causal analysis. Proven track record of translating ambiguous business questions into rigorous analytical frameworks and actionable recommendations presented to senior leadership. Strong background in big data platforms (Snowflake, Databricks, Hadoop, Dremio), and a genuine enthusiasm for AI — including building Gen AI workflows with n8n and deploying automation with Claude/Anthropic APIs. U.S. citizen; no visa sponsorship required.

CORE SKILLS

SQL (Teradata, Oracle, SQL Server, Snowflake, DB2, BigQuery) | Python (pandas, scikit-learn, PySpark ML, openpyxl, REST APIs, BeautifulSoup) | SAS (BASE, STAT, GRAPH, Macro, Proc Report, Stored Processes, Enterprise Guide, Viya) | Machine Learning: Logistic Regression, GLM, Propensity Scoring, Segmentation, Forecasting | Experimental Design: A/B Testing, Statistical Inference | Big Data: Databricks, PySpark, Hadoop, Dremio, Hive | BI & Visualization: Power BI, SAS/GRAPH | Cloud: AWS, Azure, GCP (working knowledge) | Gen AI & Automation: n8n, Claude/Anthropic API, GitHub Actions | Tools: Git, Jupyter Notebook, VS Code, Excel/VBA, Jira, Airflow (familiar)

EXPERIENCE

Senior Data Analyst (Contract, Remote/Hybrid) — Wells Fargo

10/2022 – 12/2025

Remote / Charlotte, NC

- Led analytics for AML/Financial Crimes remediations (KYC/CDD/CIP/BO), building and validating population identification frameworks presented to senior directors for approval.
- Designed and executed complex SQL queries against Hadoop (Dremio/Hive), Teradata, Oracle, SQL Server, and DB2 to extract and model large-scale remediation populations; became the go-to resource for challenging technical data problems.
- Developed SAS and Python ETL pipelines to produce time-sensitive regulatory artifacts; introduced code enhancements that reduced defects in peer reviews and improved reproducibility across analyst handoffs.
- Built waterfall charts and population identification workbooks to communicate analytical findings to senior leadership with clear, actionable narratives.
- Used GitHub for code version control, peer review workflows, and artifact sharing across distributed teams.
- Recognized with a full-time offer upon project completion.

Data Analytics SQL/Python Developer (Contract, Remote) — Truist

09/2021 – 03/2022

Charlotte, NC (Remote)

- Built a rules-based decision tool in Python to guide compliance and data analysts toward optimal analytics applications, reducing decision ambiguity.
- Ran SQL queries in Snowflake to extract and analyze data from the enterprise data lake/warehouse for compliance and audit reporting.
- Performed reconciliation between ServiceNow/RITM data and mainframe outputs, identifying errors in automated ticket creation processes and presenting findings to leadership via PowerPoint.
- Authored SAS reports on the grid and created user-access compliance reports across AD and ACL repositories.

SAS/Python Developer (Contract, Remote) — Florida Blue

04/2020 – 08/2021

Jacksonville, FL (Remote)

- Designed and built agent fraud detection analytics for the SIU department, extracting and combining data from Oracle, DB2, and other sources using SAS and Python.
- Automated and scheduled SAS ETL jobs in Unix; created reusable macros to automate Proc Report formatting across multiple metrics.
- Built visualizations and dashboards using Power BI and Python to communicate analytical insights to business stakeholders.
- Trained team members on SAS stored processes design, covering GUI creation and dynamic variable handling.

Insurance Data Scientist / Data Manager — National General (Allstate)

04/2015 – 12/2019

New York, NY

- Independently developed and deployed a logistic regression model to score auto policyholder risk — model was adopted into production.
- Created actuarial loss triangles used in reserving analyses and reconciled outputs with the company's general ledger.
- Built company-wide YTD summary reports in Excel (VBA/array formulas) to support quarterly SEC filings (10-Q, 10-K).
- Worked on pricing models in partnership with external consultancies, providing clean, validated data extracts and SAS analytics.
- Reported directly to the holding company's Chief Actuary; served as the primary data and analytics resource for the actuarial team.

Data Scientist / SAS Programmer (Contract → FTE) — AIG

12/2011 – 12/2014

New York, NY

- Designed and built ETL pipelines to extract data from mainframe (VSAM), DB2, SQL Server, and Oracle into SAS — these tables became the data foundation for the Global Actuarial Pricing department.
- Created a smart policy-linking algorithm using insured and policy characteristics in SAS, which served as the foundation for the AQI (Account Quality Index) propensity scoring model.
- Collaborated with Deloitte consultants on Commercial Auto pricing and Specialty Workers' Comp predictive models, ensuring data quality and model deliverables met specifications.
- Developed loss triangle macros for LDF derivation and ultimate claim estimation used across multiple lines of business.

Data Analyst (Contract) — Capital One

01/2011 – 11/2011

Toronto, ON

- Supported AML efforts (KYC/CDD) using Excel/VBA and PowerPoint for reporting and monitoring.
- Built an automated SAS/Graph dashboard running weekly on Unix, distributed to leadership for web performance monitoring.
- Created ETL jobs and scheduled them in Unix to load vendor files into SAS and Teradata.

Senior Data Analyst (Contract → FTE) — Aviva Canada

05/2008 – 12/2010

Toronto, ON

- Independently designed SAS stored processes to automate loss ratio report creation with user-friendly GUIs.
- Provided structured data to EEA consultants for risk and pricing model development, ensuring accurate policy-claims matching.
- Created OLAP fact and dimension tables using SAS OLAP Cube Studio; documented all data structures via HTML and VBA.

EDUCATION

Master's in Statistics — University of São Paulo, Brazil

Bachelor's in Statistics — University of São Paulo, Brazil

Bachelor's in Mathematics — University of São Paulo, Brazil

MBA — EAESP-FGV, São Paulo, Brazil
