Figma

Re: Data Scientist

I am excited to apply for the Data Scientist role at Figma. With over 15 years of experience as a data scientist and analyst across insurance, banking, and healthcare—and a graduate degree in Statistics from the University of São Paulo—I bring the deep technical foundation, cross-functional collaboration skills, and end-to-end project ownership that Figma is looking for. I took a brief break from work for health reasons and am now fully ready and genuinely excited to return and contribute at full capacity.

Throughout my career I have partnered with Product, Finance, Compliance, and Marketing stakeholders to translate ambiguous business questions into rigorous, high-impact data solutions. At Wells Fargo I owned complex remediation data projects from population scoping through regulatory artifact delivery, leveraging SQL across Hadoop (Dremio/Hive), Teradata, and Oracle, and presenting findings to senior directors. At National General I independently built and deployed a logistic regression risk-scoring model for auto policyholders. I have worked extensively with distributed data systems including Snowflake, PySpark/Spark, Databricks, and Hive—all highlighted in Figma's job description—and I use Python and SAS daily for modeling, ETL automation, and statistical analysis.

What draws me to Figma specifically is the company's commitment to democratizing design and to making data accessible across the entire organization—values that resonate directly with how I approach data work. I thrive in fast-moving, cross-functional environments where a data scientist is expected to be both a technical problem-solver and a strategic thought partner, and I am energized by the opportunity to contribute to a product used by millions of creative professionals worldwide.

I would welcome the chance to discuss how my background in statistical modeling, distributed data systems, and cross-functional collaboration can contribute to Figma's data team. Thank you for your time and consideration.

Sincerely,

José R. Sousa
