SUMMARY

Senior Data Engineer / Data Analyst with 15+ years of experience building end-to-end data pipelines, ETLs, and analytical models across insurance, banking, and healthcare. Proven track record owning data from raw source to executive-facing reports — designing ingestion, modeling, and delivery without handoffs. Deep expertise in SQL, Python, SAS, and big data platforms (Snowflake, Databricks, Hadoop/Hive, Dremio). Strong with cloud environments (GCP, AWS, Azure) and experienced transforming raw multi-source data into business-ready analytics. Excellent communicator who translates ambiguous business questions into trusted data models and answers. Self-directed, highly analytical, and comfortable operating at scale.

CORE SKILLS

SQL (Teradata, Oracle, SQL Server, DB2, Snowflake, BigQuery-compatible) | Python (pandas, SQLAlchemy, REST APIs, openpyxl, PySpark ML, automation) | SAS (BASE, STAT, GRAPH, macros, stored processes, ETL, Proc Report, Enterprise Guide, Viya) | Big Data: Snowflake, Databricks, PySpark, Hadoop, Dremio, Hive | Cloud: GCP, AWS, Azure (working knowledge) | Airflow / orchestration concepts | dbt-compatible data modeling (layered ETL, dimensional modeling, OLAP) | Data pipeline design & infrastructure | Git / GitHub | Power BI | Excel / VBA | JSON, XML, RegEx | n8n (Gen AI workflow automation) | Jira, Confluence, SharePoint

EXPERIENCE

Senior Data Analyst (Contract) — Wells Fargo

10/2022 – 12/2025

Remote / Hybrid

- Owned end-to-end data pipelines for AML / Financial Crimes remediations (CIP, BO, CDD, KYC), from raw source extraction through final artifact delivery used by regulators.
- Wrote complex, optimized SQL queries extracting data from Hadoop via Dremio and Hive, plus Teradata, Oracle, SQL Server, and DB2 — served as go-to engineer for challenging technical data problems.
- Built and maintained SAS ETL code that produced remediation artifacts from which customer refunds and regulatory letters were issued; engineered automated backup enhancements when analyst turnover occurred.
- Created AML remediation population identification workbooks and waterfall charts presented to senior directors, translating messy business questions into data-backed answers.
- Designed and executed code test scripts, collaborating with testers to validate pipeline correctness before production deployment.
- Developed ad-hoc, time-sensitive data extracts and reports under strict Confluence procedures and compliance controls.
- Recognized with a full-time offer at project completion.

Data Analytics SQL/Python Developer (Contract) — Truist

09/2021 – 03/2022

Charlotte, NC (Remote)

- Ran SQL queries in Snowflake data lake/warehouse to support compliance analytics and access-control reporting.
- Built a rules-based decision tool (Python web form) enabling compliance and data analysts to select their optimal analytics application.
- Reconciled ServiceNow/RITM ticket data against mainframe extracts to validate automated processes; presented findings to stakeholders.
- Created SAS grid reports and produced documentation following internal templates.

SAS/Python Developer (Contract) — Florida Blue

04/2020 – 08/2021

Jacksonville, FL (Remote)

- Developed ETL pipelines extracting data from Oracle and DB2 using SAS 9.4 on AIX Unix and Enterprise Guide; automated and scheduled batch jobs via SAS macros.
- Built multi-source fraud detection analytics for the SIU department, engineering metrics and automating report formatting with Proc Report macros.
- Automated file transfers and cross-platform data movement using Windows batch, WinSCP, VBScript, and SFTP.
- Designed and deployed SAS stored processes for canned reporting with a user-friendly GUI; trained team members on stored process design.
- Created visualizations and reports using Power BI and Python.

Insurance Data Programmer / Data Manager — National General (Allstate)

04/2015 – 12/2019

New York, NY

- Owned data end-to-end: planned and built SAS datasets by extracting and joining data from Oracle, SQL Server, and legacy systems, producing actuarial loss triangles and business analytics.
- Created quarterly company-wide YTD summary reports in Excel using GL Oracle data to support SEC filings (10-K, 10-Q) and annual report preparation.
- Reconciled actuarial data with the general ledger; participated in ATLAS project capturing claim/policy-level data into Oracle GL.
- Independently developed a logistic regression scoring model for auto policyholder risk — model was deployed to production.
- Provided data extracts and reports to internal stakeholders, consultants, auditors, and regulators; produced complete legacy data documentation.

Data Scientist / SAS Programmer (Contract → FTE) — AIG

12/2011 – 12/2014

New York, NY

- Designed and built ETL pipelines ingesting data from IBM mainframe (VB/VSAM files), DB2, SQL Server, and Oracle into SAS — these tables became the data foundation of the Global Actuarial Pricing department.
- Created SAS macros to produce loss triangles for LDF derivation and ultimate claims estimation across multiple lines of business.
- Built policy-linking algorithm in SAS as the foundation for the AQI scoring model; scheduled weekly Qlikview dashboard refresh jobs.
- Worked with Deloitte consultants to deliver data, loss triangles, and validated SAS code for Commercial Auto and Specialty Workers' Comp pricing models.
- Performed deep-dive profitability analyses on losses, premium, and policy attributes across lines of business.

Senior Data Analyst (Contract → FTE) — Aviva Canada

05/2008 – 12/2010

Toronto, ON

- Independently designed and coded SAS stored processes and ETL pipelines to automate loss ratio reporting and in-force policy extraction.
- Built facts and dimensions tables with SAS OLAP Cube Studio; authored data dictionaries and HTML documentation for all tables and processes.
- Planned and delivered clean, matched policy/claims datasets to EEA consultants for risk and pricing model development.
- Created the Fleet Rate Tracking Report — a cross-functional project requiring rate deconstruction via SAS and VBA.

EDUCATION

Master's in Statistics — University of São Paulo, Brazil

Bachelor's in Statistics — University of São Paulo, Brazil

Bachelor's in Mathematics — University of São Paulo, Brazil

MBA — EAESP-FGV, São Paulo, Brazil
